In Vivo Atlas of Deep Brain Structures S. Lucerna, F.M. Salpietro, C. Alafaci, F. Tomasello

This 'in vivo' atlas contains more than 50 magnetic resonance (MR) images of the brain. Each structure is represented in the axial, coronal and sagittal plane, magnified in colour schemes and reconstructed in 3D images with a useful millimetric scale. The atlas offers the reader a practical and simple tool for surgical planning and for diagnostic and anatomical studies. The high level of anatomical definition of the in vivo MR images means that there is no loss in precision as a result of post-mortem changes. No doubt, this book is an excellent teaching instrument for all students of the neurosciences, regardless of the individual level of training and expertise.
