One of leading figures of his day, Roger Sherman was a member of the five-man committee that drafted the Declaration of Independence and an influential delegate at the Constitutional Convention. As a Representative and Senator in the new republic, he had a hand in determining the proper scope of the national government's power as well as drafting the Bill of Rights. In *Roger Sherman and the Creation of the American Republic*, Mark David Hall explores Sherman's political theory and shows how it informed his many contributions to America's founding.

A close examination of Sherman's religious beliefs provides insight into how those beliefs informed his political actions. Hall shows that Sherman, like many founders, was influenced by Calvinist political thought, a tradition that played a role in the founding generation's opposition to Great Britain, and led them to develop political institutions designed to prevent corruption, promote virtue, and protect rights. Contrary to oft-repeated assertions that the founders advocated a strictly secular policy, Hall argues persuasively that most founders believed Christianity should play an important role in the new American republic.
