A First Course in Differential Equations (Undergraduate Texts in Mathematics)

J David Logan

A First Course in Differential Equations (Undergraduate Texts in Mathematics) J David Logan

This concise and up-to-date textbook is designed for the standard sophomore course in differential equations. It treats the basic ideas, models, and solution methods in a user friendly format that is accessible to engineers, scientists, economists, and mathematics majors. It emphasizes analytical, graphical, and numerical techniques, and it provides the tools needed by students to continue to the next level in applying the methods to more advanced problems. There is a strong connection to applications with motivations in mechanics and heat transfer, circuits, biology, economics, chemical reactors, and other areas. Moreover, the text contains a new, elementary chapter on systems of differential equations, both linear and nonlinear, that introduces key ideas without matrix analysis. Two subsequent chapters treat systems in a more formal way. Briefly, the topics include: First-order equations: separable, linear, autonomous, and bifurcation phenomena; Second-order linear homogeneous and non-homogeneous equations; Laplace transforms; and Linear and nonlinear systems, and phase plane properties.

From reader reviews:

Johnny Allen:

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a wander, shopping, or went to often the Mall. How about open or perhaps read a book eligible A First Course in Differential Equations (Undergraduate Texts in Mathematics)? Maybe it is to be best activity for you. You know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with the opinion or you have different opinion?

Julia Flowers:

As people who live in typically the modest era should be up-date about what going on or information even knowledge to make them keep up with the era that is certainly always change and advance. Some of you maybe will certainly update themselves by reading through books. It is a good choice in your case but the problems coming to an individual is you don't know which you should start with. This A First Course in Differential Equations (Undergraduate Texts in Mathematics) is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

Gene Lyons:

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their particular friends. Usually they accomplishing activity like watching television, about to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Might be reading a book is usually option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the guide untitled A First Course in Differential Equations (Undergraduate Texts in Mathematics) can be excellent book to read. May be it could be best activity to you.

James Holmes:

Your reading 6th sense will not betray you actually, why because this A First Course in Differential Equations (Undergraduate Texts in Mathematics) guide written by well-known writer who really knows well how to make book that could be understand by anyone who have read the book. Written with good manner for you, dripping every ideas and composing skill only for eliminate your own personal hunger then you still doubt A First Course in Differential Equations (Undergraduate Texts in Mathematics) as good book not only by the cover but also from the content. This is one guide that can break don't ascertain book by its handle, so do you still needing an additional sixth sense to pick this particular!?! Oh come on your reading sixth sense already said so why you have to listening to an additional sixth sense.
