**Wireless Hacking: Projects for Wi-Fi Enthusiasts: Cut the cord and discover the world of wireless hacks!** Lee Barken, Eric Bermel, John Eder, Matt Fanady, Alan Koebrick, Michael Mee, Marc Palumbo Sales of wireless LANs to home users and small businesses will soar this year, with products using IEEE 802.11 (Wi-Fi) technology leading the way, according to a report by Cahners research. Worldwide, consumers will buy 7.3 million wireless LAN nodes--which include client and network hub devices--up from about 4 million last year. This third book in the "HACKING" series from Syngress is written by the SoCalFreeNet Wireless Users Group and will cover 802.11 a/b/g ("Wi-Fi") projects teaching these millions of Wi-Fi users how to "mod" and "hack" Wi-Fi access points, network cards, and antennas to run various Linux distributions and create robust Wi-Fi networks.

Cahners predicts that wireless LANs next year will gain on Ethernet as the most popular home network technology. Consumers will hook up 10.9 million Ethernet nodes and 7.3 million wireless out of a total of 14.4 million home LAN nodes shipped. This book will show Wi-Fi enthusiasts and consumers of Wi-Fi LANs who want to modify their Wi-Fi hardware how to build and deploy "homebrew" Wi-Fi networks, both large and small.

\* Wireless LANs next year will gain on Ethernet as the most popular home network technology. Consumers will hook up 10.9 million Ethernet nodes and 7.3 million wireless clients out of a total of 14.4 million home LAN nodes shipped.

\* This book will use a series of detailed, inter-related projects to teach readers how to modify their Wi-Fi hardware to increase power and performance to match that of far more expensive enterprise networking products. Also features hacks to allow mobile laptop users to actively seek wireless connections everywhere they go!

\* The authors are all members of the San Diego Wireless Users Group, which is famous for building some of the most innovative and powerful "home brew" Wi-Fi networks in the world.

**From reader reviews:**

**Sam Holmes:**

Now a day individuals who Living in the era exactly where everything reachable by talk with the internet and the resources in it can be true or not demand people to be aware of each information they get. How many people to be smart in acquiring any information nowadays? Of course the answer is reading a book. Studying a book can help men and women out of this uncertainty Information specially this Wireless Hacking: Projects for Wi-Fi Enthusiasts: Cut the cord and discover the world of wireless hacks! book because this book offers you rich data and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it you know.

**Ann Edwards:**

Wireless Hacking: Projects for Wi-Fi Enthusiasts: Cut the cord and discover the world of wireless hacks! can be one of your beginner books that are good idea. All of us recommend that straight away because this book has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort that will put every word into pleasure arrangement in writing Wireless Hacking: Projects for Wi-Fi Enthusiasts: Cut the cord and discover the world of wireless hacks! but doesn't forget the main level, giving the reader the hottest as well as based confirm resource details that maybe you can be certainly one of it. This great information may drawn you into brand new stage of crucial considering.

**Todd Robinson:**

Many people spending their moment by playing outside having friends, fun activity having family or just watching TV the entire day. You can have new activity to shell out your whole day by studying a book. Ugh, think reading a book can really hard because you have to take the book everywhere? It okay you can have the e-book, having everywhere you want in your Smartphone. Like Wireless Hacking: Projects for Wi-Fi Enthusiasts: Cut the cord and discover the world of wireless hacks! which is finding the e-book version. So , try out this book? Let's see.

**Quincy Nelson:**

Is it an individual who having spare time then spend it whole day by simply watching television programs or just resting on the bed? Do you need something new? This Wireless Hacking: Projects for Wi-Fi Enthusiasts: Cut the cord and discover the world of wireless hacks! can be the reply, oh how comes? A fresh book you know. You are therefore out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these publications have than the others?
