## **Farming in a Changing Climate: Agricultural Adaptation in Canada (Sustainability and the Environment)**

Canadian farming has evolved under the influence of climate and weather -- a process that continues with climate change. In farming systems across the country, effective risk management is necessary to deal with drought, flooding, and extreme weather, and to adapt to altered climate and weather conditions.

Unfortunately, climate-change risks and opportunities are not always well understood among researchers and policy-makers in the Canadian agri-food sector. This book addresses that gap.

*Farming in a Changing Climate* provides a wide-ranging synopsis of what climate change means for Canadian agriculture, explores different approaches to the topic, and presents examples of current research. It covers all agricultural regions and a wide variety of commodity production and farming systems. Comments from agricultural producers and policy-makers add a practical component to the book and emphasize the value of the applied research.

This comprehensive survey synthesizes twenty years of research on climate change and Canadian agriculture. The book will be of interest to scholars in environmental studies, geography, and sociology; policy analysts and policy-makers; and representatives of the agri-food industry.

#### **Jose Garcia:**

As a pupil exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their pastime. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country.

Therefore this Farming in a Changing Climate: Agricultural Adaptation in Canada (Sustainability and the Environment) can make you sense more interested to read.
