Organic Structures from 2D NMR Spectra, Instructor's Guide and Solutions Manual L. D. Field, H. L. Li, A. M. Magill

The derivation of structural information from spectroscopic data is now an integral part of organic chemistry courses at all Universities. Over recent years, a number of powerful two-dimensional NMR techniques (*e.g.* HSQC, HMBC, TOCSY, COSY and NOESY) have been developed and these have vastly expanded the amount of structural information that can be obtained by NMR spectroscopy. Improvements in NMR instrumentation now mean that 2D NMR spectra are routinely (and sometimes automatically) acquired during the identification and characterisation of organic compounds.

Organic Structures from 2D NMR Spectra is a carefully chosen set of more than 60 structural problems employing 2D-NMR spectroscopy. The problems are graded to develop and consolidate a student's understanding of 2D NMR spectroscopy. There are many easy problems at the beginning of the collection, to build confidence and demonstrate the basic principles from which structural information can be extracted using 2D NMR. The accompanying text is very descriptive and focussed on explaining the underlying theory at the most appropriate level to sufficiently tackle the problems.

Organic Structures from 2D NMR Spectra

- Is a graded series of about 60 problems in 2D NMR spectroscopy that assumes a basic knowledge of organic chemistry and a basic knowledge of one-dimensional NMR spectroscopy
- Incorporates the basic theory behind 2D NMR and those common 2D NMR experiments that have proved most useful in solving structural problems in organic chemistry
- Focuses on the most common 2D NMR techniques – including COSY, NOESY, HMBC, TOCSY, CH-Correlation and multiplicity-edited C-H Correlation.
- Incorporates several examples containing the heteronuclei ^{31}P , ^{15}N and ^{19}F

Organic Structures from 2D NMR Spectra is a logical follow-on from the highly successful “*Organic Structures from Spectra*” which is now in its fifth edition. The book will be invaluable for students of Chemistry, Pharmacy, Biochemistry and those taking courses in Organic Chemistry.

From reader reviews:

Eunice Bourque:

Playing with family in the park, coming to see the sea world or hanging out with friends is thing that usually you have done when you have spare time, after that why you don't try issue that really opposite from that. I activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Organic Structures from 2D NMR Spectra, Instructor's Guide and Solutions Manual, it is possible to enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its known as reading friends.

George Cornelius:

In this age globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to your account is Organic Structures from 2D NMR Spectra, Instructor's Guide and Solutions Manual this book consist a lot of the information on the condition of this world now. This kind of book was represented how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. The particular writer made some study when he makes this book. Here is why this book appropriate all of you.

Chuck Deschenes:

Is it anyone who having spare time and then spend it whole day simply by watching television programs or just laying on the bed? Do you need something new? This Organic Structures from 2D NMR Spectra, Instructor's Guide and Solutions Manual can be the answer, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this fresh era is common not a nerd activity. So what these publications have than the others?

Dennis Rodriguez:

Within this era which is the greater person or who has ability to do something more are more treasured than other. Do you want to become one of it? It is just simple solution to have that. What you are related is just spending your time not very much but quite enough to possess a look at some books. One of several books in the top collection in your reading list is usually Organic Structures from 2D NMR Spectra, Instructor's Guide and Solutions Manual. This book which is qualified as The Hungry Hillside can get you closer in turning into precious person. By looking way up and review this reserve you can get many advantages.
