## **GIS for the Urban Environment** Juliana Maantay, John Ziegler

This introduction to urban planning applications and problem solving with GIS is appropriate for students and professionals in the fields of geography, urban studies, urban planning, urban public health, urban environmental assessment, and hazard and emergency management. Technical jargon is minimized while the analytical concepts are fully described, enabling full use and understanding of GIS techniques. Infused in the included laboratory exercises are real-world activities that are often required in urban GIS projects but rarely included in prepared lab work, such as data acquisition, integrating data into the GIS, and manipulation of real data. Project design and analysis methodologies are also demonstrated with real-life examples of urban GIS projects.
