## **In the Shadow of Melting Glaciers: Climate Change and Andean Society** Mark Carey

Climate change is producing profound changes globally. Yet we still know little about how it affects real people in real places on a daily basis because most of our knowledge comes from scientific studies that try to estimate impacts and project future climate scenarios. This book is different, illustrating in vivid detail how people in the Andes have grappled with the effects of climate change and ensuing natural disasters for more than half a century. In Peru's Cordillera Blanca mountain range, global climate change has generated the world's most deadly glacial lake outburst floods and glacier avalanches, killing 25,000 people since 1941. As survivors grieved, they formed community organizations to learn about precarious glacial lakes while they sent priests to the mountains, hoping that God could calm the increasingly hostile landscape. Meanwhile, Peruvian engineers working with miniscule budgets invented innovative strategies to drain dozens of the most unstable lakes that continue forming in the twenty first century.

But adaptation to global climate change was never simply about engineering the Andes to eliminate environmental hazards. Local urban and rural populations, engineers, hydroelectric developers, irrigators, mountaineers, and policymakers all perceived and responded to glacier melting differently-based on their own view of an ideal Andean world. Disaster prevention projects involved debates about economic development, state authority, race relations, class divisions, cultural values, the evolution of science and technology, and shifting views of nature. Over time, the influx of new groups to manage the Andes helped transform glaciated mountains into commodities to consume. Locals lost power in the process and today comprise just one among many stakeholders in the high Andes-and perhaps the least powerful. Climate change transformed a region, triggering catastrophes while simultaneously jumpstarting modernization processes. This book's historical perspective illuminates these trends that would be ignored in any scientific projections about future climate scenarios.

### **From reader reviews:**

#### **Mary Marshall:**

Book is to be different for each grade. Book for children right up until adult are different content. To be sure that book is very important normally. The book In the Shadow of Melting Glaciers: Climate Change and Andean Society ended up being making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The guide In the Shadow of Melting Glaciers: Climate Change and Andean Society is not only giving you much more new information but also to become your friend when you really feel bored. You can spend your current spend time to read your e-book. Try to make relationship with the book In the Shadow of Melting Glaciers: Climate Change and Andean Society. You never sense lose out for everything in case you read some books.

#### **Josephine Lowe:**

The book with title In the Shadow of Melting Glaciers: Climate Change and Andean Society includes a lot of information that you can discover it. You can get a lot of gain after read this book. This book exist new expertise the information that exist in this guide represented the condition of the world right now. That is important to you to be aware of how the improvement of the world. This book will bring you in new era of the the positive effect. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

#### **David Eaton:**

Playing with family in a very park, coming to see the sea world or hanging out with close friends is thing that usually you may have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love In the Shadow of Melting Glaciers: Climate Change and Andean Society, it is possible to enjoy both. It is good combination right, you still need to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't have it, oh come on its known as reading friends.

#### **Elizabeth Givens:**

As a scholar exactly feel bored for you to reading. If their teacher requested them to go to the library as well as to make summary for some guide, they are complained. Just little students that has reading's internal or real their hobby. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this In the Shadow of Melting Glaciers: Climate Change and Andean Society can make you truly feel more interested to read.
