[{ BIODEGRADATION AND BIOREMEDIATION }] by Alexander, Martin (AUTHOR) Apr-06-1999 [Hardcover] Martin Alexander

Biodegradation has been the subject of active concern for the past 40 years. Recently, the field has expanded to encompass a wide variety of chemicals, a broad array of issues, and the development of the new bioremediation industry. This book presents the basic principles of biodegradation and shows how these principles relate to bioremediation. Authored by a world-renowned environmental microbiologist, "Biodegradation and Bioremediation" presents microbiological, chemical, toxicological, environmental, engineering, and technological aspects of the subject. Praise for the first edition: 'Serves an important function in presenting a complete picture of biodegradation in the environment. I[t] provides biologists, chemists and engineers interested in this process with information complementary to their own fields and thus belongs on the shelf of everybody active in the study of biodegradation and bioremediation' - "Journal of Contaminant Hydrology". 'A compendious account of the field in a form accessible to microbiologists, chemists, toxicologists and environmental scientists and engineers. His book succeeds admirably...Well indexed, its diagrams large and clear ...It will serve as an excellent text for advanced undergraduate and postgraduate courses and as an invaluable source of reference to all those with a research interest in this expanding field' - "Society for General Microbiology Quarterly". 'The book could serve as a text for an upper-level or graduate class in the principles of biodegradation and bioremediation for microbiologists and environmental engineers. In summary, Alexander has prepared a cogent and well-organized review of the principles of biodegradation in a book that should prove useful to a great many people' - "Journal of Environmental Quality". 'Provides a unity of style, and generally, an excellent intellectual flow between topics...Alexander does a spectacular job of addressing the kinetics of degradation reactions - the discussion is one of

From reader reviews:

Donna Sedillo:

Information is provisions for those to get better life, information currently can get by anyone at everywhere. The information can be a know-how or any news even a problem. What people must be consider any time those information which is inside former life are challenging to be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you find the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take [{ BIODEGRADATION AND BIOREMEDIATION }] by Alexander, Martin (AUTHOR) Apr-06-1999 [Hardcover] as the daily resource information.

Reginald Hunter:

Spent a free time to be fun activity to try and do! A lot of people spent their down time with their family, or their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could possibly be reading a book may be option to fill your free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the guide untitled [{ BIODEGRADATION AND BIOREMEDIATION }] by Alexander, Martin (AUTHOR) Apr-06-1999 [Hardcover] can be very good book to read. May be it can be best activity to you.

Benjamin Nation:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are having problem with the book compared to can satisfy your short space of time to read it because this all time you only find guide that need more time to be examine. [{ BIODEGRADATION AND BIOREMEDIATION }] by Alexander, Martin (AUTHOR) Apr-06-1999 [Hardcover] can be your answer because it can be read by an individual who have those short time problems.

Donna Canales:

Is it you who having spare time and then spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This [{ BIODEGRADATION AND BIOREMEDIATION }] by Alexander, Martin (AUTHOR) Apr-06-1999 [Hardcover] can be the response, oh how comes? It's a book you know. You are therefore out of date, spending your free time by reading in this fresh era is common not a geek activity. So what these guides have than the others?
